MILES BEINING

IT STINGS

A Collection of Prose and Poetry

Here flows a web of horror and imagination that will take you inside the strange and haunting heads of a diverse array of characters and show you the nature of worlds and places far outside the confines of what we perceive as reality. Explore the looming terrors and shadows of the paranormal hidden just beyond our sight, the places that the human brain will venture if things go just a bit awry, and the whispers of a larger universe with no end. It stings, doesn't it? The venom of fear?
